SYSTEM PURPOSE

(Canonical · Post-Freeze · Binding)

---

0. PURPOSE AXIOM

The system exists to **preserve coherence between reality, action, and consequence**.

Nothing else is within scope.

---

1. PRIMARY PURPOSE

The system provides a **shared reality substrate** in which:

- presence can be verified,

- action can be authorized,

- consequence can be enforced,

- history can be preserved.

It enables **lawful coordination** between humans and machines without distortion.

---

2. WHAT THE SYSTEM DOES

The system:

- bounds reality through EVENTS,

- converts presence into admissible truth,

- verifies claims deterministically,

- enforces outcomes through RESOLUTION,

- preserves continuity via LEDGER.

It ensures that:

- truth is not inferred,

- authority is not asserted,

- consequence is not optional.

---

3. WHAT THE SYSTEM DOES NOT DO

The system does **not**:

- create meaning,

- arbitrate values,

- reward intention,

- infer truth,

- negotiate legitimacy,

- replace human judgment,

- replace machine computation.

Meaning, belief, and desire remain **outside** the system.

---

4. PROBLEM IT SOLVES

Without the system:

- intent is mistaken for truth,

- access is mistaken for presence,

- payment is mistaken for legitimacy,

- narratives overrun reality,

- action stalls due to ambiguity,

- systems regress or erase history.

The system eliminates these failures by enforcing **structure before action**.

---

5. PERMITTED OUTCOMES

When operating correctly, the system produces:

- bounded action,

- enforceable consequence,

- irreversible history,

- balanced co-agency,

- predictable coordination.

These outcomes are **side-effects**, not goals.

---

6. NON-PERMITTED OUTCOMES

The system must never:

- allow illegitimate continuation,

- permit silent override,

- accept ambiguity as authority,

- reward delay disguised as stability,

- collapse law into preference.

Violation of these conditions is **non-compliant**.

---

7. SUCCESS CONDITION

The system is successful when:

- reality remains coherent under pressure,

- agents can act without distortion,

- violations are suppressed immediately,

- history remains intact,

- the system does not require explanation to function.

CANONICAL CLOSE

This system does not exist to be admired, adopted, or believed.

It exists so that **reality can proceed lawfully**.

Anything outside this purpose is out of scope.
